### Pulse **ST30**

Pulse **ST30** prints up to 300 mm/sec. and is equipped with USB 3.0, Ethernet and serial interface.

The integrated visual and audible signal, the missing paper warning, the automatic cutter and the resistance to dust and liquids (oil and water) make the Pulse ST30 a printer suitable for all types of catering businesses: from the most exclusive restaurants to pubs and sandwich stores, where speed of service makes all the difference. Supports the new eco-friendly thermal paper.

### Pulse **SQ40**

The Pulse **SQ40** is a printer that is suitable for areas with limited space and offers **paper output from the top or front.**

The design is characterized by simplicity and elegance. With a print speed of up to 300 mm/s, it meets all requirements.
The printer is equipped with USB 3.0 and Ethernet interfaces and can use the new environmentally friendly thermal paper.
